# Same walls. Same brand. *A different company* underneath.

*What the prior era built. What the new era built. And what we kept on purpose.*

THEN · PRIOR OWNERSHIP

## A brand ahead of its *engine*.

World-class creative and innovation no one else could touch — but the operation was never built to carry the brand at scale.

| | |
|---|---|
| BRAND · R&D | Iconic. Truffles, bars, bacon bar, PB-PB cup. |
| SYSTEMS | 15-year-old CMS · Nutracoster recipe tool, 20+ yrs · islands of data. |
| FLOOR TOOLS | Paper pick lists. Paper counts. Rekeying everywhere. |
| QA | Manual inspection. Errors caught downstream — often after shipment. |
| CAPACITY | ~4,167 orders/day peak · manual-heavy · single-carrier rate card. |
| COST / SHIP | $34.47 avg · legacy pricing · no carrier optionality. |
| SERVICE | Customer replies averaged 24–48 hours. |

> *"The PB-PB cup never left a kitchen recipe." The creative was there. The chassis to ship it wasn't.*

NOW · CURRENT OWNERSHIP

## The brand, *plus the engine it deserves*.

Same building. Same team DNA. A modernized operational spine — connected systems, instrumented floors, simpler choices at every step.

| | |
|---|---|
| BRAND · R&D | Kept intact. Innovation calendar protected — the reason you buy Vosges. |
| SYSTEMS | Current-gen MRP retires the 15-yr CMS · Flavor Studio AI recipe platform replaces Nutracoster. |
| FLOOR TOOLS | Tablets & scanners on every station. Paper usage cut by 50%. |
| QA | 98.2% pick accuracy (Gorgias FY25) · checkweigher + scan-verified · errors caught pre-seal. |
| CAPACITY | ~6,500 orders/day sustainable on the same footprint · 5,268/day already proven (Dec 2025). |
| COST / SHIP | $18.38 avg (FY25 DTC) — carrier simplification + rate negotiation. |
| SERVICE | Under 1-hour first-response with Gorgias + 24/7 virtual agents. |

> *What we kept on purpose: the creative, the flavor R&D, the brand voice. None of the upgrade touched the product.*

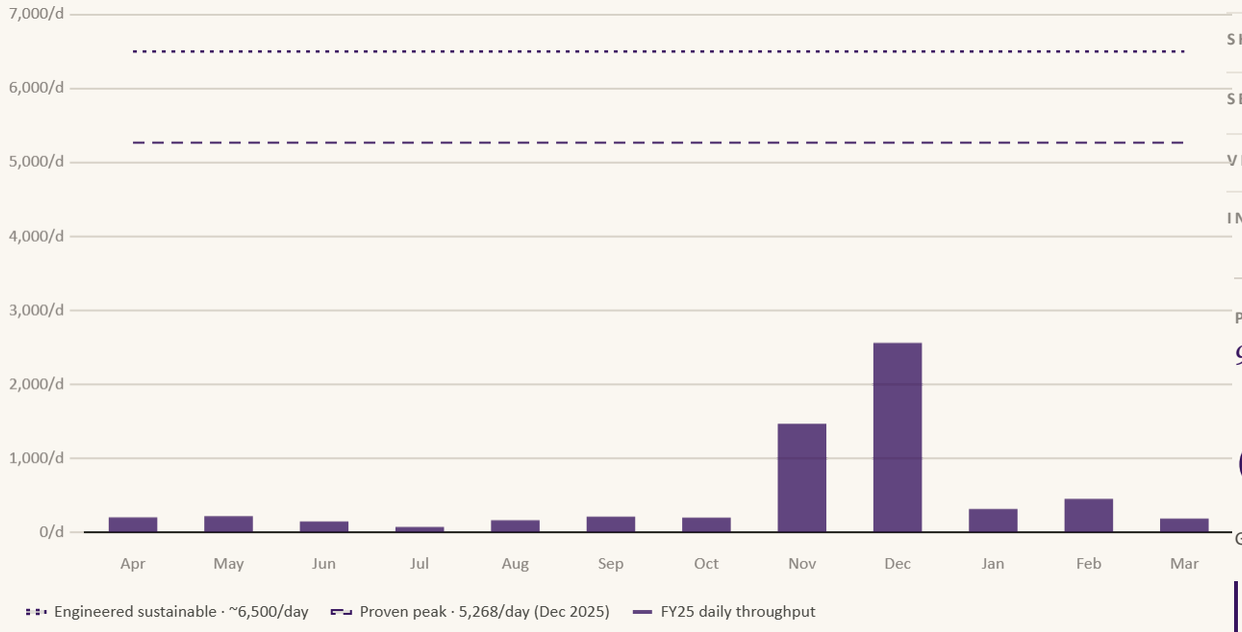
| SUSTAINABLE DAILY SHIPPING CAPACITY | SINGLE-DAY PEAK PROVEN · DEC 2025 | SERVER TAX YEAR OVER YEAR | END-OF-LIFE RISK RETIRED LEGACY STACK |

EXHIBIT · CAPACITY ALREADY BUILT

## Proven to 5,268/day. Engineered to sustain *~6,500*.

*FY25 monthly daily average throughput (ShipStation) against the single-day peak we've proven and the ceiling we've engineered. December 2025 averaged 2,563/day and peaked at 5,268 — on the same footprint that capped at 4,167/day in 2023.*



MONTHLY FY25 · SAME BUILDING · SAME RACKING · SAME CREW

WHAT THE MODERNIZATION DELIVERED

| | | |
|---|---|---|
| MRP | Retired the 15-year CMS; current-gen MRP in its place. | *1 stack* |
| RECIPE | Flavor Studio replaces Nutracoster (20+ yrs) — AI at the bench. | *Next-gen* |
| FLOOR | Tablets & scanners at every station. Paper −50%. | *Every station* |
| SHIPPING | Carrier simplification. Ice & unboxing standardized. | *−47% $/ship* |
| SERVICE | Gorgias + 24/7 agents — answered under the hour. | *24–48h → 1h* |
| VISIBILITY | Live dashboards. 24/7 automated audits. Data-driven decisions. | *Always-on* |
| INTEGRATION | Every system talks to every other system. | *One graph* |

PICK ACCURACY · GORGIAS FY25

*98.2%* of shipped orders — no customer-reported issue.

**98.2%**

GORGIAS TICKET RATE · FY25

**Held the line during the rebuild.** *Q4 2025 — the quarter we re-sequenced the pick line — shipped record holiday volume (Dec 2025: 61,503 shipments, peak 5,268/day) without degrading the accuracy floor.*

# Faster. Simpler. *And then — portable.*

*An $80,000 investment that pays itself back in sixteen weeks — and teaches us how to wire the next warehouse in a week, not a year.*

PHASE TWO · ON THE LINE

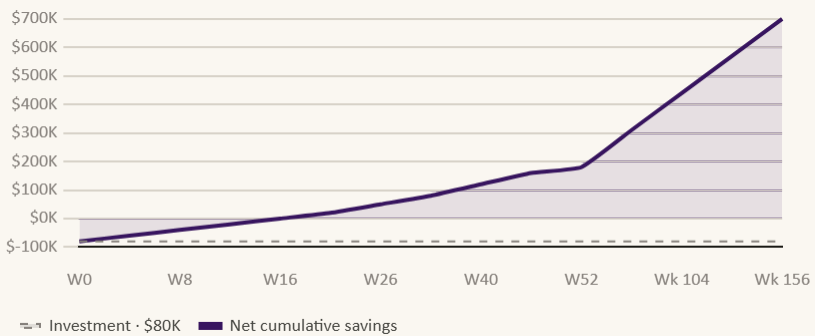
## The things that still look *manual.*

| | |
|---|---|
| *Gift orders* | Dedicated box-maker station at the line's head. Gift-note printed on scan — never missed again. |
| *QA stop* | QA & Organizer merge into one role. One person owns the box before it moves. |
| *Sealing* | Auto-sealer replaces manual tape & fold. Seasonal rental — paid back in one peak week. |
| *Labeling* | Three-tap ShipStation Mobile retired. Auto peel-and-apply labeler takes over. |
| *Boxes* | Sizes re-aligned to FedEx One Rate tiers. New SKUs require box-team approval. |
| *Bedding* | Pre-cut, known-weight. The checkweigher stops guessing; shipping math becomes exact. |

THE MATH · CUMULATIVE $ THROUGH THE DOOR

## $80K out. *$780K back.*

| Wk 16 | Wk 52 | Yr 3 |
|---|---|---|
| BREAK-EVEN | +$180K NET | +$700K NET |



**Read it this way —** *every line of cost stays flat; every line of savings stacks. The curves cross at week sixteen. Everything after is structural margin on the P&L.*

AND THEN — THE REAL UNLOCK

## A template that *travels.*

Chicago — HUB · FULL SKU
Node II — SUBSET
Node III — SUBSET

Every simplification on this line is a step toward a *standard* — something we can wire somewhere else.

A *portable warehouse template.* Light up a second location to fulfill a subset of products — closer to the customer, faster to deliver, cheaper to ship.

*Not a bigger building.* A smarter network.

*Simplify first. Replicate second. The next warehouse is a configuration, not a construction project.*
