VOSGES HAUT-CHOCOLAT · A CONVERSATION ABOUT CAPABILITY

Same walls. Same brand. *A different company underneath.*

What the prior era built, what the new era built, and what we kept on purpose.

THEN · PRIOR OWNERSHIP

A brand ahead of its engine.

World-class creative. Innovation no one else could touch.
But the operation was never built for the brand.

BRAND · R&D	Iconic. Truffles, bars, bacon bar, PB-PB cup.
SYSTEMS	15-year-old CMS · Nutracoster recipe tool, 20+ yrs · islands of data.
FLOOR TOOLS	Paper pick lists. Paper counts. Rekeying everywhere.
QA	Manual inspection — errors caught downstream, often after shipment.
CAPACITY	~1,440 orders/day peak · manual-heavy · single carrier.
COST / SHIP	$30.83 · legacy pricing · no carrier optionality.
SERVICE	Customer replies averaged 24–48 hours.

> *"The PB-PB cup never left a kitchen recipe." The creative was there. The chassis to ship it wasn't.*

1,440	28	$30.83
DAILY CAPACITY PEAK	PEAK-SEASON STAFF	COST PER SHIPMENT

NOW · CURRENT OWNERSHIP

The brand, *plus the engine it deserves.*

Same building. Same team DNA. A modernized operational spine —
connected systems, instrumented floors, simpler choices everywhere.

BRAND · R&D	**Kept intact.** Innovation calendar protected — the reason you buy Vosges.
SYSTEMS	**Current-gen MRP** retires the 15-yr CMS · **Flavor Studio** AI replaces Nutracoster.
FLOOR TOOLS	**Tablets & scanners** every station. Paper **cut 50%.**
QA	**99.97% pick accuracy** · checkweigher + scan-verified · errors caught pre-seal.
CAPACITY	**~5,000/day sustainable** · 2,618/day already proven.
COST / SHIP	**$12.32** — carrier simplification + negotiation.
SERVICE	**Under 1-hour first-response** with Gorgias + 24/7 virtual agents.

> **What we kept on purpose:** the creative, the flavor R&D, the brand voice. None of the upgrade touched the product.

THE DIVIDEND OF MODERNIZATION · AND WHAT HELD DURING THE REBUILD

A footprint sized for December. *Running in April.*

Fewer systems, better ones. More throughput, same walls. Faster answers, at every door — even while the line was being rebuilt.

~5,000
SUSTAINABLE DAILY
SHIPPING CAPACITY

18 /day
HRS RECLAIMED DAILY
TABLETS & SCANNERS · ~$60K Y1

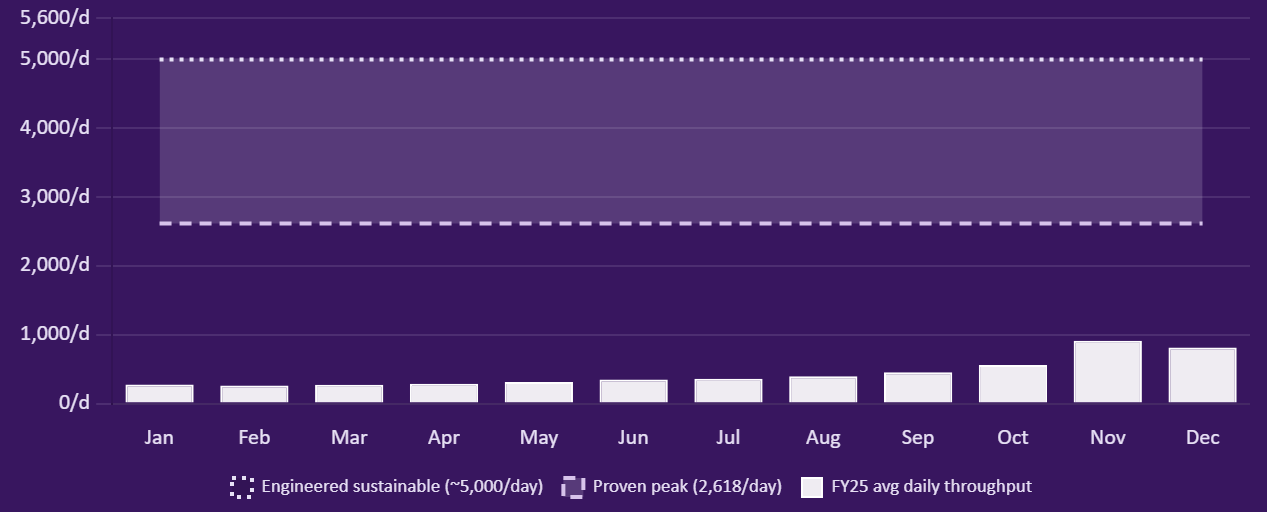
−50 %
SERVER TAX
YEAR OVER YEAR

−75 %
END-OF-LIFE RISK
RETIRED LEGACY STACK

THE UNLOCK · CAPACITY ALREADY BUILT

Proven to 2,618/day. Engineered to sustain ~5,000.

Same building. Same racking. Same crew. Automation absorbs the variance.

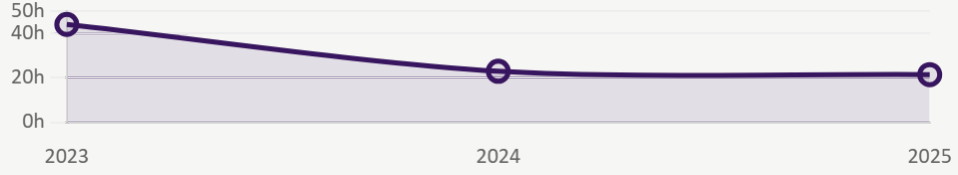


FY25 monthly average daily throughput against proven and engineered ceilings.

WHAT THE MODERNIZATION DELIVERED

MRP	Retired the **15-year CMS**; current-gen MRP in its place.	1 stack
RECIPE	**Flavor Studio** replaced **Nutracoster** (20+ yrs) — AI at the bench.	Next-gen
FLOOR	Tablets & scanners every station. **Paper down 50%.**	~18 hrs/day
QA	Checkweigher + scan-verified picks. Errors caught **pre-seal.**	99.97%
SHIPPING	Carrier simplification. Ice & unboxing standardized.	−60% $/ship
SERVICE	Gorgias + 24/7 virtual agents — answered **under an hour**.	24–48h → 1h
VISIBILITY	Live dashboards. 24/7 automated audits. Decisions on data.	Always-on

CUSTOMER RESPONSE TIME — TREND



Held the line during the rebuild. Q4 2025 — the quarter we re-sequenced the pick line — closed tickets at the same speed as Q4 2024. Customers didn't feel the transition.

WHAT LIES AHEAD · PHOENIX PHASE TWO · AND BEYOND

Faster. Simpler. *And then — portable.*

An $80K investment that pays itself back in sixteen weeks — and teaches us how to wire the next warehouse in a week, not a year.

$80K	$5K/wk	16 wks	$260K	$780K	25–35%
PHASE 2 INVEST	ONGOING SAVINGS	PAYBACK PERIOD	YEAR-1 ANNUALIZED	THREE-YEAR CUMULATIVE	OVERHEAD CUT ON THE LINE

PHASE TWO · ON THE LINE

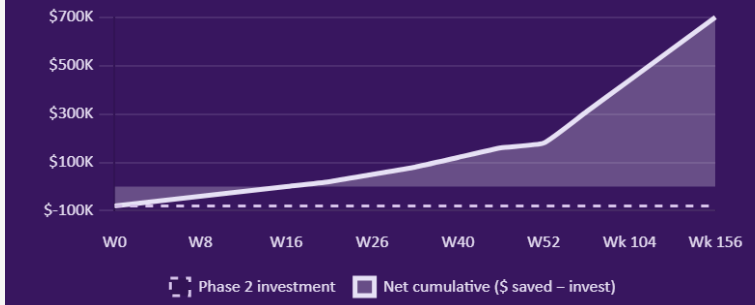
The things that still look *manual.*

Gift orders	**Dedicated box-maker station** at the line's head. Gift-note printed on scan — never missed again.
QA stop	**QA & Organizer merge** into one role. One person owns the box before it moves.
Sealing	**Auto-sealer** replaces manual tape & fold. Seasonal rental — paid back in a single peak week.
Labeling	Three-tap ShipStation Mobile retired. **Auto peel-and-apply labeler** takes over.
Boxes	Sizes re-aligned to **FedEx One Rate tiers.** New SKUs need box-team approval.
Bedding	Pre-cut, known-weight. The checkweigher stops guessing; shipping math becomes exact.

THE MATH · CUMULATIVE $ IN THE DOOR

$80K out. *$780K back.*

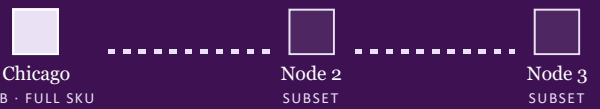
Wk 16	Wk 52	Yr 3
BREAK-EVEN	+$180K NET	+$700K NET



Read it this way — *every line of cost stays flat; every line of savings stacks. The curves cross at week sixteen. Everything after is structural margin on the P&L.*

AND THEN — THE REAL UNLOCK

A template that *travels.*



Every simplification on this line is a step toward a **standard** — something we can wire somewhere else.

A **portable warehouse template**. Light up a second location to fulfill a subset of products — closer to the customer, faster to deliver, cheaper to ship.

Not a bigger building. A smarter network.

Simplify first. Replicate second. The next warehouse is a **configuration**, not a construction project.
